- a) Risk Profiling
To establish a customer's attitude to investment risk (relates to pensions and investments) advisors have automated calculators which calculate the customers attitude to various levels of risk having answered a series of questions. The results of the Risk Profile Questionnaire will be shared and discussed with the customer and is intended as a guidance tool.
 - b) Establishing affordability and providing quotations for financial services products. We may use an automated underwriting system to provide an indication of the special terms that may be applied to a proposal for life insurance or a similar protection product, in the event that the proposer for life insurance or a similar protection product, has a pre-existing medical condition. We do this simply to manage the expectation of the proposer at the outset of the process and to ensure the accuracy of our advice. No personal details are entered into the automated underwriting system and it is intended only for guidance purposes.
 - c) PEP check.
